

NISHANTH TK

Python Full stack Web Developer

Enthusiastic Python Full Stack Developer with a strong foundation in building scalable web applications using Django, REST APIs. Skilled in database design, problem-solving, and writing clean, efficient code. Passionate about learning new technologies and delivering end-to-end solutions that improve user experience.

EXPERIENCE

CYBEXEL TECHNOLOGIES PRIVATE LIMIT
ASSOCIATE WEB DEVELOPER - Vallarpadam, Kochi
01 April 2024 - 05 April 2026

- Develop and maintain responsive websites using HTML, CSS, JavaScript, Django
- Optimize performance, cross-browser compatibility, and mobile responsiveness.
- Assist in debugging, testing, and deploying new features.
- Collaborate with teams to deliver client requirements efficiently

PROJECTS

buysel.in – Real Estate Platform

Built a full-featured real estate platform with four user modules:

- Users: Search and connect with property owners directly.
- Sellers: Register, pay a fee, and manage listings with 1-year validity.
- Premium Agents: Paid registration with admin access for property and lead management.
- Agents: Create profiles to connect with buyers

My Jewellery My Design – Jewellery Platform

- Developed a jewellery platform with cart, wishlist.
- Implemented secure login via Google sign-in and OTP phone verification.
- Built backend using Django REST Framework, ensuring scalable APIs with strong performance and security

Tikito (Ticket Booking Platform Research)

- Conducted research for building a low-convenience-fee ticket booking platform

sparescorporation.com (Furniture Showcase Website)

- Developed a dynamic and modern website for showcasing furniture collections.
- Implemented responsive layouts and admin-driven product updates to maintain a fully dynamic structure
